GF.

SITE RELIABILITY / DEVOPS / CLOUD

Getachew Ferede.

Reliable systems. Thoughtful automation.

I bring Linux administration, cloud infrastructure, and software delivery together to support dependable services and solve operational problems.

WASHINGTON DC-BALTIMORE AREA

Available for on-call rotation / U.S. Permanent Resident

01

Build

Repeatable infrastructure with AWS, Terraform, CloudFormation, Ansible, and Chef.

02

Operate

Production support, container workloads, monitoring, and operational investigation.

03

Improve

Python applications, internal workflows, and document-grounded AI services.

INSIDE THE PORTFOLIO

Infrastructure & automation	02	AI services & data	03
Security & operations	04	Career experience	05
Technical toolkit	06	Education & credentials	07

SELECTED WORK / 01-02

Infrastructure & automation

01 / END-TO-END OPERATIONS

End-to-end server management

From provisioning and deployment to monitoring, maintenance, and operational support.

Linux | AWS | Docker | Kubernetes | Grafana

Related experience: Modus Technology Services · Feb 2017-May 2020; Belle Fleur Technologies · Mar 2021-Jul 2023.

- Managed Linux users, groups, permissions, storage quotas, disks, and network connectivity.
- Owned AWS server provisioning, application deployment, monitoring, and ongoing support.
- Supported Docker and Kubernetes workloads and investigated issues using logs and monitoring signals.
- Performed backups, system maintenance, diagnosis, and escalations.

Reliability focus: day-to-day ownership across the server lifecycle.

02 / AWS INFRASTRUCTURE AS CODE

AWS infrastructure automation

Repeatable provisioning and configuration for client cloud environments.

AWS | Terraform | CloudFormation | Ansible | Chef

Related experience: Belle Fleur Technologies · Mar 2021-Jul 2023.

- Provisioned AWS infrastructure with Terraform and AWS CloudFormation.
- Used Ansible and Chef for configuration management and repeatable operational changes.
- Supported Jenkins CI/CD workflows alongside Git and GitHub.
- Designed and managed infrastructure with security, reliability, and cost in mind.

Reliability focus: consistent infrastructure and repeatable changes.

SELECTED WORK / 03-04

AI services & data

03 / MULTILINGUAL ASSISTANCE

Multilingual AI call center

A conversational service designed for 24/7 assistance to Maryland residents.

Python | Google Cloud | Vertex AI | Twilio

University of Maryland Extension · Jul 2023-Aug 2026.

- Built Python web interfaces and integrated Google Cloud, Vertex AI, and Twilio Voice and SMS APIs.
- Implemented document ingestion and retrieval-augmented generation to ground answers in departmental content.
- Defined agent configurations, prompts, and guardrails for responsible operation.
- Led a small engineering team and translated stakeholder needs into implementation priorities.

Service focus: accessible assistance grounded in program knowledge.

04 / DATA PREPARATION & REPORTING

Cloud data workflows & program dashboards

Data preparation, querying, and reporting that make operational and program information easier to use.

aws Glue DataBrew | aws Amazon Athena | aws QuickSight | Tableau | Looker Studio

Belle Fleur Technologies · Mar 2021-Jul 2023; University of Maryland Extension · Jul 2023-Aug 2026.

- Built AWS Glue DataBrew data preparation and ETL workflows while checking data quality.
- Queried data with Amazon Athena and produced Amazon QuickSight analytics.
- Built Tableau and Looker Studio dashboards to track outreach and program metrics.

Delivery focus: clear, useful visibility for stakeholders.

SELECTED WORK / 05

Security & operational readiness

Cloud protection experience supported by hands-on virtual SOC training.

PRODUCTION INFRASTRUCTURE

Protecting web-facing AWS services

Belle Fleur Technologies / Mar 2021 - Jul 2023

- Protected web-facing AWS infrastructure with WAF, Shield, and Firewall Manager.
- Monitored HTTP/HTTPS requests and controlled content access.

AWS WAF | AWS Shield | Firewall Manager

SIMULATED INCIDENT INVESTIGATION

Virtual Security Operations Center

Trend Micro CPITS / May 2021 - Jul 2021

- Built a virtual SOC and investigated simulated incidents with Apex One, Vision One, TippingPoint, and Cloud One Workload Security.
- Completed Red and Blue team exercises during a 10-week security program.

Trend Micro | Linux | Python | Docker | Kubernetes

OPERATIONS FOUNDATION

Monitoring, diagnosis, backups, traffic analysis, team response, and escalations form part of my Linux administration background.

Training also covered networking, cloud-native application security, and AWS architecture fundamentals.

CAREER EXPERIENCE

A foundation built in operations

JUL 2023 - AUG 2026

IT Program Manager

University of Maryland Extension | Marylanders Online | Onsite | Promoted from Digital Navigator

Led a small engineering team delivering internal applications and automations. Translated stakeholder requirements into technical priorities; built the multilingual AI call center and RAG workflows, Python automations, and Tableau / Looker Studio dashboards. Identified 10 high-impact AI and RAG use cases for digital literacy and equity.

MAR 2021 - JUL 2023

Solutions Architect

Belle Fleur Technologies | Maryland, USA | Remote

Owned AWS provisioning, application deployment, monitoring, and ongoing support. Automated infrastructure with Terraform and CloudFormation and configuration with Ansible and Chef. Supported Docker, Kubernetes, and Jenkins workflows; investigated issues with Grafana, Nagios, and ELK; applied AWS security controls and built data workflows.

APR 2021 - MAY 2022

Junior Cloud Practitioner Technical Trainer

Generation USA | Washington, DC | Onsite

Taught AWS EC2, S3, DevOps, and Python through small-group sessions, practical exercises, and office hours. Supported learners with varied backgrounds, substituted for the lead instructor, and tracked progress in Salesforce and Canvas.

MAY 2021 - JUL 2021

Cybersecurity Intern

Trend Micro Inc. | Certification Program in IT Security | Dallas, TX | Remote

Completed a 10-week program in Linux, Python, networking, containers, cloud-native security, and AWS fundamentals. Built a virtual SOC and investigated simulated incidents during Red and Blue team exercises.

FEB 2017 - MAY 2020

Linux System Administrator

Modus Technology Services (MTS Inc.) | Laurel, MD | Hybrid

Managed users, groups, permissions, storage quotas, disks, and network access. Troubleshot connectivity, performed backups and maintenance, and supported monitoring, diagnosis, traffic analysis, and escalations.

TECHNICAL TOOLKIT

The tools behind the work

CLOUD

- AWS
- Amazon EC2
- Amazon S3
- Google Cloud

AUTOMATION & CONFIGURATION

- Terraform
- CloudFormation
- Ansible
- Chef
- Puppet

SYSTEMS & RUNTIME

- Linux
- Docker
- Kubernetes
- RHEL
- CentOS
- Ubuntu
- Fedora
- Windows Server
- Apache
- Tomcat
- PuTTY

OBSERVABILITY & SECURITY

- Grafana
- Nagios
- Elasticsearch
- Logstash
- Kibana
- AWS WAF
- AWS Shield
- Firewall Manager
- Trend Micro

DEVELOPMENT & DELIVERY

- Python
- C
- Jenkins
- Git
- GitHub
- Jira

AI & DATA

- Vertex AI
- Twilio
- n8n
- MySQL
- Glue DataBrew
- Amazon Athena
- QuickSight
- Tableau
- Looker Studio

EDUCATION & PROFESSIONAL DEVELOPMENT

Continuous learning. Practical depth.

EDUCATION

Diploma in Governance Regulations and Compliance

BCR Cyber | USA

Bachelor of Arts

Addis Ababa University | Ethiopia

CREDENTIALS & PROFESSIONAL DEVELOPMENT

- CompTIA Security+ and CompTIA A+
- AWS Certified Cloud Practitioner - earned Feb 2021; listed expiry Feb 2024
- AWS Partner Accreditations - Technical, Business, Cloud Economics
- Trend Micro Certified Professional for Deep Security 20
- Google AI Essentials
- A Cloud Guru - Python 3 Scripting for System Administrators; DevOps Essentials; LPI Linux Essentials; Microsoft Azure Fundamentals
- Learning Terraform - LinkedIn Learning

TECHNICAL FOUNDATIONS

Services & protocols: NFS, SSH, Telnet, Apache, Tomcat, DNS, TCP/IP.

Troubleshooting: Network configuration, routing, subnetting, netstat, tcpdump, SIEM tools.

AI integration: RAG, AI agents, agentic workflows, MCP servers, Voice and SMS APIs.
