GETACHEW FEREDE

SRE / Devops Engineering and Cloud Operations

+1 202-352-7923 | yalga730@gmail.com | *linkedin.com/in/gechlink* | U.S. Permanent Resident

PROFESSIONAL SUMMARY

Cloud infrastructure and reliability professional with almost 10 years in sysadmin roles, software development environments and hands-on experience in production server operations, infrastructure as code (IaC), Kubernetes, CI/CD, and observability. Leads a small engineering team and builds Python and cloud applications, including a multilingual conversational service using Google Cloud, Vertex AI, and Twilio. Translates stakeholder requirements into technical delivery and owns problem resolution. Available for on-call rotation.

TECHNICAL SKILLS

- **Cloud & infrastructure:** AWS (EC2, S3), Google Cloud (GCP), Vertex AI, Linux, Docker, Kubernetes
- **IaaC and configuration:** Terraform, AWS CloudFormation, Ansible, Puppet, Chef
- **Observability and security:** Grafana, Nagios, ELK (Elasticsearch, Logstash, Kibana), SIEM tools
- **Development and CI/CD:** Python, C, Jenkins, Git, GitHub, Jira
- **Servers/Services**: NFS, SSH, Telnet, Apache, Tomcat, DNS, Netstat TCP/IP and TCP DUMP
- **Networking & Databases:** Network configuration, routing, subnetting, PuTTY, MySQL
- **Operating Systems**: RHEL/CentOS 6/7, Windows R2 2012/2016, Ubuntu, Fedora
- **AI & Integrations:** Twilio Voice and SMS APIs, RAG, AI agents, Agentic workflows, MCP servers, N8N

PROFESSIONAL EXPERIENCE

University of Maryland Extension | Marylanders Online (Onsite) (3 years)

IT Program Manager (promoted by Digital Navigator) | July 2023 – August 2026

- Lead a small engineering team delivering internal applications and automations; translate stakeholder and business requirements into technical scope and implementation priorities.
- Built a multilingual AI call center designed for 24/7 assistance to Maryland residents, integrating Python web interfaces, Google Cloud, Vertex AI, and Twilio Voice and SMS APIs.
- Implemented document ingestion and retrieval-augmented generation (RAG) workflows to ground responses in departmental content; defined agent configurations, prompts, and guardrails for responsible operation.
- Create custom Python scripts, workflow automations, and internal applications to improve project team efficiency; use AI-assisted development to support implementation.
- Built Tableau and Looker Studio dashboards to track outreach and program metrics, providing visibility into project effectiveness and sustainability.
- Identified 10 high-impact use cases through research on AI, RAG, and large language models for digital literacy and equity.

Belle Fleur Technologies | Maryland, USA (Remote) (~2.5 years)

Solutions Architect | March 2021 - July 2023

- Designed and managed secure, reliable, cost-effective AWS infrastructure for clients, owning production server provisioning, application deployment, monitoring, and ongoing support.
- Provisioned and configured AWS infrastructure with Terraform and AWS CloudFormation; used Ansible and Chef for system configuration and repeatable operational changes.
- Supported production Docker and Kubernetes workloads and continuous integration and delivery (CI/CD) workflows using Jenkins, Git, and GitHub.
- Monitored infrastructure and application health with Grafana, Nagios, and ELK; reviewed logs and monitoring signals to investigate operational issues.

- Protected web-facing infrastructure with AWS WAF, AWS Shield, and AWS Firewall Manager; monitored HTTP/HTTPS requests and controlled access to content.
- Built cloud data preparation and ETL workflows with AWS Glue DataBrew, queried data with Amazon Athena, and produced Amazon QuickSight analytics while checking data quality.

Generation USA | Washington, DC (Onsite) (~1 year)

Junior Cloud Practitioner Technical Trainer | April 2021 - May 2022

- Taught AWS EC2 compute, S3 storage, DevOps concepts, and Python coding through small-group sessions, practical exercises, and office hours.
- Explained cloud and development concepts to learners with varied technical backgrounds, substituted for the lead instructor, and tracked progress in Salesforce and Canvas.

Trend Micro Inc. | Dallas, TX (Remote) (3 months)

Cybersecurity Intern | Certification Program in IT Security | May 2021 - July 2021

- Built a virtual Security Operations Center (SOC) and investigated simulated incidents using Apex One, Vision One, TippingPoint, and Cloud One Workload Security during Red and Blue team exercises.
- Completed a 10-week program combining labs and instruction in Linux, Python, networking, Docker, Kubernetes, cloud-native application security, and AWS architecture fundamentals.

Modus Technology Services (MTS Inc.) | Laurel, MD (Hybrid) (3.5 years)

Linux System Administrator | Feb 2017 - May 2020

- Administer system access controls by creating and managing user and group accounts, network access configuration, passwords, permissions and storage quotas.
- Disk Management- added and partioned hard disk and troubleshooted network connectivity issues.
- Perform backup duties related to regular system maintenance procedures, including performing system re-boot, running rdclean, truncating system log files.
- Provide monitoring for both hardware and software needs, including system monitoring, problem diagnosis, backups, account, permission maintenance, mailflow, traffic analysis, team response and escalations

EDUCATION

Diploma in Governance Regulations and Compliance | BCR Cyber, USA

Bachelor of Arts | Addis Ababa University, Ethiopia

CERTIFICATIONS AND PROFESSIONAL DEVELOPMENT

- CompTIA Security+
- CompTIA A+
- Google AI Essentials - Google
- Python 3 Scripting for System Administrators; DevOps Essentials; LPI Linux Essentials and Microsoft Azure Fundamentals - A Cloud Guru
- AWS Partner Accreditations: Technical, Business, Cloud Economics
- Learning Terraform - LinkedIn Learning
- AWS Certified Cloud Practitioner
- Trend Micro Certified Professional for Deep Security
